CONTENTS

Volume 18, Issue Nos. 1–12 (1994)

International Journal for
NUMERICAL METHODS IN FLUIDS

Issue No. 1, 15 January

Co-located Equal-order Control-volume Finite Element Method for Two-dimensional Axisymmetric Incompressible Fluid Flow: C. Masson, H. J. Saabas and B. R. Baliga 1

Unstructured Volume-agglomeration MG: Solution of the Poisson Equation: B. Koobus, M.-H. Lallemand and A. Dervieux 27

p-version Least Squares Finite Element Formulation for Two-dimensional, Incompressible Fluid Flow: D. Winterscheidt and K. S. Surana 43

Tools for Simulating Non-stationary Incompressible Flow via Discretely Divergence-free Finite Element Models: S. Turek 71

An Efficient Shock-capturing Algorithm for Compressible Flows in a Duct of Variable Cross-section: P. Glaister 107

CONFERENCE DIARY 123

Issue No. 2, 30 January

p-version Least Squares Finite Element Formulation for Two-dimensional, Incompressible, Non-Newtonian Isothermal and Non-isothermal Fluid Flow: B. C. Bell and K. S. Surana 127

Modelling the Non-linear Interaction of Wind and Tide: its Influence on Current Profiles: A. M. Davies and J. Lawrence 163

On the Difficulties and Remedies in Enforcing the $div = 0$ Condition in the Finite Element Analysis of Thermal Plumes with Strongly Temperature-dependent Viscosity: D. L. Coulliette and M. Koch 189

A New General-purpose Least-squares Finite Element Model for Steady Incompressible Low-viscosity Laminar Flow using Isoparametric C^1-continuous Hermite Elements: V. Nassehi and J. Petera 215

CONFERENCE DIARY 227

Indexed or abstracted by 'Applied Mechanics Reviews', 'BHRA Fluid Engineering Centre', 'Boundary Elements Abstracts', 'Cambridge Scientific Abstracts', 'Chemical Abstracts', 'CITIS—Civil Engineering Abstracts', 'Compumath Citation Index Institute for Scientific Information (ISI)', 'Current Contents (CC)/Eng, Tech & Applied Sciences', 'Engineering Index', 'Eng. Societies Library', 'Geographical Abstracts: Physical Geography', 'Geological Abstracts', 'INSPEC', 'Mathematical Reviews', 'Mechanics', 'Newsletter of Eng. Analysis Software', 'Research Alert (ISI)', 'SCISEARCH Database (ISI)', and 'Zentralblatt für Mathematik'.

Issue No. 3, 15 February

Linear and Non-linear Iterative Methods for the Incompressible Navier–Stokes Equations: S. S. Clift and P. A. Forsyth 229

New Numerical Method for Partial Differential Equations. 1: Application to the Diffusion Equation: P. Hatzikonstantinou 257

A Conservative and Shape-preserving Semi-Lagrangian Method for the Solution of the Shallow Water Equations: P. Garcia-Navarro and A. Priestley 273

Optimal Estimation of Eddy Viscosity for a Quasi-three-dimensional Numerical Tidal and Storm Surge Model: R. W. Lardner and S. K. Das 295

Treatment of Numerical Diffusion in Strong Convective Flows: G. Arampatzis, D. Assimacopoulos and E. Mitsoulis 313

CONFERENCE DIARY 333

Issue No. 4, 28 February

EDITORIAL iii

Numerical Simulation of Free Shear Flows and Far-field Sound Pressure Directivity: W. Y. Soh 337

A Comparison of Second-order and Fourth-order Pressure Gradient Algorithms in a σ-co-ordinate Ocean Model: J. D. McCalpin 361

Investigation of Flux Formulae in Transonic Shock Wave/turbulent Boundary Layer Interaction: D. Drikakis and F. Durst 385

Solution of the Axisymmetric Inverse Problem by Higher-order Line Doublets: M. F. Zedan 415

CONFERENCE DIARY 433

Issue No. 5, 15 March

Calculation of Separated Flow Around Multi-element Aerofoils using Conformal Mapping: J. Cao 437

A Numerical Method for 3D Viscous Incompressible Flows using Non-orthogonal Grids: P. He and M. Salcudean 449

Equivalence of $\mathbf{u}$–p and ζ–ψ Formulations of the Time-dependent Navier–Stokes Equations: J.-L. Guermond and L. Quartapelle 471

Multigrid Pressure Correction Techniques for the Computation of Quasi-incompressible Internal Flows: P. Luchini and A. D'Alascio 489

Aspects of the Transpiration Model for Aerofoil Design: K. F. C. Yiu and P. Stow 509

On the Riemann Problem for Liquid or Gas–liquid Media: T.-J. Chen and C. H. Cooke 529

CONFERENCE DIARY 543

Issue No. 6, 30 March

On Estimating Pressure Build-up in Severely Accelerated, Shocked Flow: C. H. Cooke 545

A Contribution to the Great Riemann Solver Debate: J. J. Quirk 555

A Second-order Radiation Boundary Condition for the Shallow Water Wave Equations on Two-dimensional Unstructured Finite Element Grids: M. Johnsen and D. R. Lynch 575

A Vertex-centred Finite Volume Method with Shock Detection: P. I. Crumpton and G. J. Shaw 605

CONFERENCE DIARY 627

Issue No. 7, 15 April

Numerical Investigations of Radial Jet Reattachment Flows: H. Laschefski, D. Braess, H. Haneke and N. K. Mitra 629

Implicit Schemes for Unsteady Euler Equations on Triangular Meshes: A. S. Sens and G. D. Mortchelewicz 647

A Net Inflow Method for Incompressible Viscous Flow with Moving Free Surface: S. P. Wang and K. K. Wang 669

Natural Convection Flow in a Square Cavity Revisited: Laminar and Turbulent Models with Wall Functions: G. Barakos, E. Mitsoulis and D. Assimacopoulos. 695

Issue No. 8, 30 April

Generalized Integral Transform Solution for Boundary Layer Flow Over a Sphere: P. L. C. Lage and R. H. Rangel 721

Finite Volume Methods for Laminar and Turbulent Flows using a Penalty Function Approach: J. Simoneau and A. Pollard 733

Adaptive Panel Methods and their Integration with CAD: T. David and R. Lewis. 747

An Algebraic Multigrid Solver for Navier–Stokes Problems: R. Webster 761

Chebyshev Collocation Method and Multidomain Decomposition for the Incompressible Navier–Stokes Equations: A. Pinelli and A. Vacca 781

CONFERENCE DIARY 801

Issue No. 9, 15 May

A Finite Volume Scheme for Two-phase Compressible Flows: R. Saurel, A. Forestier, D. Veyret and J.-C. Loraud 803

Finite Element Analysis of Multicomponent Two-phase Flows with Interphase Mass and Momentum Transport: P. R. Schunk and R. R. Rao 821

A Multigrid Method for Predicting Periodically Fully Developed Flow: L. Bai, N. K. Mitra, M. Fiebig and A. Kost 843

Taylor–Galerkin-based Spectral Element Methods for Convection–diffusion Problems: L. J. P. Timmermans, F. N. van de Vosse and P. D. Minev 853

The Effects of Flow Split Ratio and Flow Rate in Manifolds: H. Fu, A. P. Watkins and M. Yianneskis 871

Issue No. 10, 30 May

Multigrid Solution of Compressible Turbulent Flow on Unstructured Meshes using a Two-equation Model: D. J. Mavriplis and L. Martinelli 887

On the Approximation of Horizontal Gradients in Sigma Co-ordinates for Bathymetry with Steep Bottom Slopes: G. S. Stelling and J. A. Th. M. van Kester 915

Boundary Element Method Solution of MHD Flow in a Rectangular Duct: M. Tezer-Sezgin 937

Analysis of Periodic 3D Viscous Flows using a Quadratic Discrete Galerkin Boundary Element Method: C. Y. Chan, A. N. Beris and S. G. Advani 953

Résumé and Remarks on the Open Boundary Condition Minisymposium: R. L. Sani and P. M. Gresho 983

Issue No. 11, 15 June

Finite Element Implementation of Boundary Conditions for the Pressure Poisson Equation of Incompressible Flow: S. Hassanzadeh, V. Sonnad and S. Foresti .. 1009

The Influence of Normal Flow Boundary Conditions on Spurious Modes in Finite Element Solutions to the Shallow Water Equations: J. J. Westerink, R. A. Luettich Jr., J. K. Wu and R. L. Kolar 1021

Application of Streamwise Diffusion to Time-dependent Free Convection of Liquid Metals: M. A. McClelland 1061

On the Group Velocity of Symmetric and Upwind Numerical Schemes: S. Karni 1073

Large-scale Computational Fluid Dynamics by the Finite Element Method: W. G. Habashi, M. Robichaud, V.-N. Nguyen, W. S. Ghaly, M. Fortin and J. W. H. Liu 1083

Transport of Radionuclides in Isolated Fractures in Crystalline Rocks: G. M. Grandi and J. C. Ferreri 1107

Numerical Boundary Conditions for Unsteady Transonic Flow Calculations: H. Jiang, B. H. K. Lee and Y. S. Wong 1121

ANNOUNCEMENTS 1133

Issue No. 12, 30 June

A Preconditioned Alternating Inner–outer Iterative Solution Method for the Mixed Finite Element Formulation of the Navier–Stokes Equations: S. Ø. Wille 1135

On the Implementation of Symmetric and Antisymmetric Periodic Boundary Conditions for Incompressible Flow: G. Segal, K. Vuik and K. Kassels 1153

Parallel Computation of the Flow of Integral Viscoelastic Fluids on a Heterogeneous Network of Workstations: P. Henriksen and R. Keunings 1167

Finite Element Formulations for Large-scale, Coupled Flows in Adjacent Porous and Open Fluid Domains: A. G. Salinger, R. Aris and J. J. Derby 1185

CONFERENCE DIARY 1211

ANNOUNCEMENTS 1213
